

## 10ft Container with steel floor

The 10ft container is the smallest size container in our product range that meets the CSC requirements. Together with the ISO certification it is therefore suitable for intermodal transportation. This product type is equipped with a steel floor, which is stronger, more wear resistant, and it does not absorb fluids as compared to the standard wooden floor.

Advantages:

- Suitable as storage and/or shipping container
- Equipped with steel floor
- Supplied with CSC approval
